## Objective

My main goal is to employ high-level creative to effectively design interactive solutions for reputable clients.

I'm hoping to relocate to an interactive agency that challenges me as a designer, and prepares me for future roles as an Art Director.

## Competence

I have a **strong** attention to detail and am visually driven and focused. I am a motivated independent worker and work well amongst a passionate team. I've had plenty of experience in interactive design and branding, but my skillset is widened by my exposure and participation in motion design, flash development, html/css development etc.

I always design with the the entire process in mind.
